

MAXIM

ENVIRONMENTAL POLICY

Maxim Ceramics Sp.z o.o. as a leading manufacturer of top-class advertising ceramics wishes to fully satisfy the growing requirements of its Customers in a manner that is both environmentally-friendly and that complies with the current legal and environmental requirements.

The environmental objectives of Maxim Ceramisc Sp. z o.o. are defined as follows:

- Compliance with legal regulations related to the environmental protection
- Implementation of the appropriate, selective waste management
- Minimisation of the amount of pollution emitted into the air
- Optimisation of the use of raw materials as well as consumables and other materials intended for production
- Elimination of the risk of environmental accidents by continuous monitoring of machinery, equipment and plants
- Compliance with occupational health and safety regulations and fire regulations
- Shaping of the environmental awareness

We accomplish our objectives by:

- complying with applicable environmental protection laws and rules
- improving our manufacturing technologies and processes so as to make them environmentally-friendly
- and satisfy the needs and expectations of our current and future recipients
- supervising the proper storage of chemicals used in production processes
- using raw materials and technologies proven in terms of safety for people and the environment in production processes
- ctions aimed at protection of natural resources through the reduction in the consumption of paper, electricity and fuels
- raising the ecological awareness of employees
- the exclusive cooperation with sewage and waste recipients who meet the legal requirements regarding environmental protection

This environmental policy is communicated to all employees of Maxim Ceramics sp. z o.o. and other people involved in the performance of work on behalf of the company. The environmental policy is available to customers, suppliers and other stakeholders. Any changes in the Environmental Policy document shall be approved and communicated by the Management of Maxim Ceramics sp. z o.o.
