

# Lavender anti-mosquito candle

## STOP - mosquitoes!

Summer evenings are conducive to meetings and celebrating various occasions. Unfortunately, even the best evening in the garden or on the terrace can be spoiled by the presence of uninvited guests - mosquitoes. If you are looking for a natural mosquito repellent, choose Candlesphere lavender advertising candle.

## Fight insects - naturally

Numerous studies show that mosquitoes cling to dark surfaces and avoid plastics. In addition, they do not like certain smells, e.g. mint, lemongrass or the lavender. Anti-mosquito candles emit fragrance, essential oils or smoke when lit. This confuses the mosquitoes' sense of smell and as a result they can no longer find their target.

## Lavender Candlesphere advertising candles

100% natural, fully biodegradable, made of 95% soy wax, Candlesphere candles contain as much as 8% lavender oil, the smell of which repels mosquitoes and other insects very well. In addition, they emit a beautiful aroma that will make every evening more pleasant. #Szerokie możliwości personalizacji

## What is important, our anti-mosquito lavender scented candles can be customized in any way!

We will apply your client's branding to the selected glass form, thanks to which it will be perfectly exposed during the summer season.
